Subject: 12455-61, Strategy for Compliance with RMD and RED
Date: 12/18/2010 04:48 PM

Dear Mr. Lublinkhof,

John and I have decided on a plan to complete the RMD and RED requirements for this product,, for which we never issued a DCI under the Rodenticide Cluster RED.

1. Completion of RMD Process

Because this process only involves labeling, we can complete the RMD Process this coming week. A condition of approval will be your submission of a revised Data Matrix.

2. Completion of RED Process

At the time of registration of this product in 1992, you had submitted acceptable product specific chemistry, acute toxicity, and efficacy data.

As should have happened during the re-registration process, we will check the data to be sure that it meets current requirements. Once you have updated any data, we will issue a Notice of Reregistration or a letter saying that you have complied with the 1998 Rodenticide Cluster RED.
